Snowflake Paper Pattern

For the snowflakes on page 26. Cut a 4-inch square from thin paper. Fold on the diagonal, then fold the triangle in half twice, matching edges.

After the three folds, use one of the cutting guides on page 74 or draw your own small notches. Open carefully and press flat.

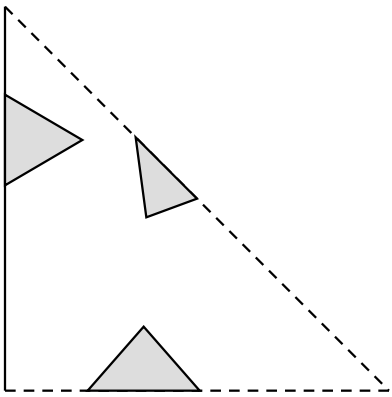
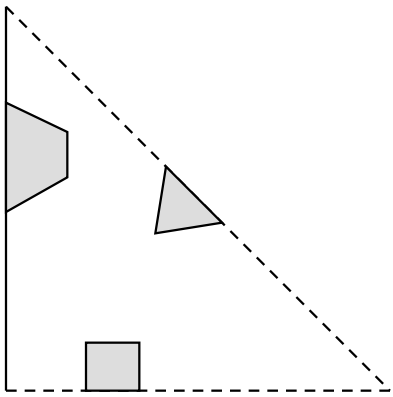
Snowflake Cutting Guides

For the snowflakes on page 26. Start with a 4-inch paper square folded as directed on page 73. Each final folded triangle has two 2-inch short sides.
Align your folded triangle with a guide. Trace the gray notches and cut only those gray areas. Keep the rest connected. The outer triangle is an alignment guide.



Guide A



Guide B

The dashed sides are folded edges. Leave plenty of connected paper along both. The vertical side is the open edge. These make simple fourfold designs.

Try a few small cuts first. Do not cut off the lower-right tip where the two folded edges meet.
